

BI-100[™]

Amscomatic's BI-100 is a high-speed continuous motion conveyor belt infeed system for Amscomatic automatic folding machines. As the operator places the leading edge of each item to be folded on the moving belts, the BI-100 rapidly feeds it to the folder increasing folding capacity by as much as 30%. Developed primarily for T-shirts, it replaces standard drape tables with a minimal loss of fold quality and can handle products up to 30" x 50" (76 x 127 cm).

The BI-100 requires no additional floor space, and is powered by the folder, enabling a single motor to drive the entire process. The BI-100 is engineered for dependable performance and low maintenance in demanding high-production environments. This high-speed unit can be easily integrated with other Amscomatic equipment into an automatic folding/bagging/sealing system.

Amscomatic's BI-100 is solidly built of heavy-duty steel and premium components for durable, long-lasting performance and smooth, quiet operation. Like all Amscomatic products, the BI-100 automatic belt infeed unit is built with Amscomatic's attention to quality, durability, and design excellence, and is backed by Amscomatic's unsurpassed service and support.

BI-100

Automatic Belt Infeed Unit

Standard Features

Design & Construction

- Built of heavy-duty steel and premium components
- Powered by folder motor

Dimensions of supported Products

- Up to 30" x 50" (76 x 127 cm)

Size (LxWxH)

- 39" x 34" x 38" (99 x 86 x 97 cm)

Support

- 24-hour hotline

Training

- Access to the M&R/Amscomatic Training Centers

Warranty

- One-year limited

Options & Accessories

Freestanding Model
