

Turnabout Series™

Automatic Ink Mixer

Eng

Turnabout Series

Turnabout offers easy operation and unparalleled control when mixing screen print inks and other coatings. The unit rotates the container rather than the mixing blade, producing a lifting and rolling action that ensures evenly blended inks. Turnabout even reaches ink that typically settles on the sides and bottoms of containers. Cleanup is fast and simple. Turnabout H.D. is specifically designed for use with thicker, more viscous inks and coatings, such as high-density plastisol.
